PROFESSIONAL SUMMARY

Motivated AI & Data Science undergraduate with hands-on experience in full-stack development, Python-based machine learning, analytics dashboards, and real-time AI systems. Skilled in building scalable applications using React.js, Node.js, Spring Boot, and modern web technologies. Strong foundation in software engineering, data analytics, and agile development with a passion for solving real-world problems through AI-driven and data-centric solutions.

EDUCATION

B.Tech – Artificial Intelligence & Data Science | VSB Engineering College, Karur 2023 – 2027 (Ongoing)

- Coursework: Machine Learning, Data Structures & Algorithms, DBMS, Statistics, OOP
- Active in agile team projects

INTERNSHIP EXPERIENCE

Full Stack Development Intern (Online) | Infosys Springboard Feb 2025 – Apr 2025

- Developed and deployed full-stack web applications using React.js, Node.js, Express.js, and Spring Boot in an agile environment
- Built RESTful APIs and integrated them with responsive front-end interfaces; implemented JWT-based authentication and role-based access control
- Collaborated on backend services with Java Spring Boot, including service-layer design, repository patterns, and REST endpoint development

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, C# (Basic)

Web Technologies: React.js, Node.js, Express.js, Spring Boot, HTML5, CSS3

Databases: MongoDB, MySQL

Data Analytics & Visualisation: Pandas, NumPy, Power BI, Tableau, Data Visualisation

Machine Learning: Predictive Analytics, ML Algorithms, OpenCV, Scikit-learn

Tools & Platforms: Git, GitHub, VS Code, Postman

Core Concepts: OOP, REST APIs, Agile Development, Data Structures & Algorithms

PROJECTS

CleanStreet – Civic Issue Management Platform github.com/keerthika01275/CivicIssue

- Full-stack platform with role-based access control, RESTful APIs for complaint workflows (reporting, assignment, voting, status tracking), and JWT authentication
- Interactive analytics dashboards with charts to monitor complaint trends and resolution performance

Stack: React.js, Node.js, Express.js, MongoDB, JavaScript

AI-Based Accident Prevention & Emergency Response System github.com/keerthika01275/AI_Road_Safety

- Real-time AI monitoring system: driver drowsiness detection, distraction monitoring, crash detection, and obstacle awareness using OpenCV
- Automated risk-level decision logic with emergency alert generation; modular Python architecture for real-time processing

Stack: Python, OpenCV

CERTIFICATIONS & ACHIEVEMENTS

- AI Foundations Associate — Oracle | Python Basics — Infosys Springboard | Java Programming — NPTEL
- Solved 200+ DSA problems on competitive coding platforms; participated in hackathons focused on AI and intelligent automation
- Led multi-member team project; developed multiple real-world projects spanning full-stack dev, analytics, automation, and AI monitoring
